ST. JOHN'S WORT (Hypericum)

Ground covering. Evergreen, shiny green leaves, large bright yellow flowers throughout summer. Grown from cuttings.

7-8 in. (growing in flats).....17¢ each.

VIBURNUM BURKWOODI

Dark green, glossy leaves become purplish after the first frost. Out of leaf for a very short time. Rounded 4 in. clusters of fragrant white flowers, pink in bud stage. Blooms as leaves unfold from February to March. Early growth is quite straggly, but matures into an Oriental-shaped small tree. This Viburnum is a must. It thrives in most any soil.

Evergreen broadleaf. Very choice and useful West of the Cascades. Low growing to 2 or 3 feet, and as wide. Leaves very large for size of plant are dark green. Small white flowers in 3 inch clusters followed by clusters of metallic turquoise blue berries.

10-12" B&B \$1.65 12-15" B&B \$2.00

VIBURNUM TOMENTOSUM MARIESII

It is a 8 to 9 foot tree with spreading horizontal branches in tiers. When flat heads of flowers spring from the axil of every leaf in May, the snow-laden effect in tiers is gorgeous. It is almost equally lovely when these flowers are followed by dense clusters of glowing small red berries in a continuous band. This is a shrub of such orderly habit of growth that it needs little if any pruning.
